

Deliver blended learning programs with Health Scholars *Virtual Learning Management*

Health Scholars One™ Blended Learning Platform improves the efficiency and effectiveness of enabling confident care and improved outcomes. Our Virtual Learning Management solution **makes delivery of modern, interactive content, including virtual reality possible.**

Evidence shows that use of two or more learning modalities enhances the effectiveness of clinical education, so we've developed a learning management platform that supports traditional eLearning, VR and screen-based simulation training, which learners can access 24/7 from a PC or mobile device.

The Health Scholars One Virtual Learning Management solution **provides learners with an intuitive dashboard** from which they can see courses and simulations that have been assigned to them, as well as courses that they can assign to themselves from our immersive content catalog. Learners can view and print their CE certificates for courses that provide Continuing Education credits.

The Virtual Learning solution **makes managing blended learning platforms easy.** Clinical educators and administrators can assign courses, track completion and learner credit, and run reports from centralized platform features, removing the burden of education management.

To learn more about the Health Scholars virtual learning solutions and our all-in-one blended learning platform visit www.healthscholars.com.

AT-A-GLANCE:

Health Scholars One™ Virtual Learning Management solution is the next generation of blended learning management solutions.

DELIVER BLENDED LEARNING

Engage learners with interactive and immersive content and VR simulation to deliver more effective blended learning pathways.

VIRTUAL REALITY

VR has unique requirements. Our platform includes xAPI to capture and communicate rich interactions and analytics. xAPI is an eLearning software specification that allows learning content and learning systems to speak to each other in a manner that records and tracks all types of learning experiences.

EMPOWER LEARNERS

Learners can review assignments, complete courses, and receive certification providing them more control over the time, pace, and place of their learning.

EASE MANAGEMENT

User management, scheduling, assignment management, and reporting are centralized platform features, making system-wide managements tasks easy.

ACCESS IMMERSIVE CONTENT

Take advantage of our catalog of VR simulations, nurse regulatory, procedural skills and specialty courses with an affordable subscription model.

MY LEARNING PORTFOLIO
